SUMMARY

With expertise in Flutter development, BLoC, Clean Architecture, Git, and AutoRoute, I build scalable and efficient applications. My experience includes API integrations, responsive UI development, and state management, ensuring seamless user experiences. Passionate about clean code and performance optimization, I constantly refine my skills to stay ahead in the industry

EXPERIENCE

Flutter developer Lead Infigoes Techcon LLP Senior Flutter developer · Kochi	Feb 2024 - Present
Flutter developer SunRule · Bangalore	Aug 2023 - Jan 2024
Flutter developer In Brototype	Aug 2022 - Aug 2023

EDUCATION

carmel college of engineering and technology btech in Trivandrum · 75	2022
---	------

SKILLS

Technical: Flutter, Dart, REST APIs, JSON, Firebase, BLoC, Clean Architecture, Hive, SQLite, Git, Python, Webscraping
Tools & Technologies: Android Studio, VS Code, Git, GitHub, Firebase, Postman, Figma
Soft Skills: Leadership, Problem Solving, Team Collaboration, Communication, Analytical Thinking, Time Management, Quick Learning

PROJECTS

PWM (Personal Wealth Management) Stack: Flutter, Firebase, REST API, BLoC, Clean Architecture A comprehensive personal finance application that helps users manage income, expenses, assets, liabilities, budgets, and financial goals through an intuitive mobile experience. - Developed multiple core modules including Dashboard, Transactions, Goals, Assets, Liabilities, and Budget Management. - Implemented scalable architecture using BLoC and Clean Architecture.	Repo
Plant a Tree Stack: Flutter, Firebase, REST API, BLoC, Clean Architecture, SECURE STORE, AUTO ROUTE A sustainability-focused mobile application that enables users to participate in tree plantation initiatives, monitor plantation activities, and contribute to environmental conservation through a seamless digital platform - Developed cross-platform mobile features using Flutter, integrating REST APIs and Firebase to deliver a seamless user experience. - Built reusable UI components, resolved production issues, and collaborated with backend developers to implement new features and optimize application performance.	Repo
GenAI Job Market Analyzer A Python-based application that analyzes job postings by scraping data from online job portals and provides insights into in-demand skills, technologies, and hiring trends.	Repo
